

CLAREMONT GRADUATE UNIVERSITY  
SCHOOL OF COMMUNITY AND GLOBAL HEALTH

*The critical challenge  
of improving the health  
and lives of ourselves and  
our families, as well as  
those in communities  
across the globe, has a  
new champion—*

## CLAREMONT GRADUATE UNIVERSITY'S SCHOOL OF COMMUNITY AND GLOBAL HEALTH

With its world-class faculty, the school is confronting the ongoing personal and economic impact of chronic diseases—diseases accounting for 60 percent of deaths worldwide; diseases forcing the U.S. and world economies to spend millions of dollars in health-care costs.

Many health challenges lie ahead. We should continue pursuing promising solutions to slow the toll of chronic community and global health issues, such as those caused or exacerbated by smoking, alcohol and drug abuse, obesity, or HIV/AIDS.

Prior to its affiliation with Claremont Graduate University, the school's programmatic strength was proven for more than 20 years, and its faculty have received multiple millions of dollars in research grants.

At CGU, the School of Community and Global Health continues its history of accomplishment under the leadership of Dean C. Anderson Johnson, a recognized leader in public-health research and training. The dean and faculty want to propel the school to a new level of excellence by preparing students to take the lead in developing health-care options and solutions.

*“The school will be the hub of a Claremont-wide effort to rethink public health. It will bear the Claremont hallmarks of impeccable quality, interdisciplinary approaches, and boldness.”*

ROBERT KLITGAARD  
*President, CLAREMONT GRADUATE UNIVERSITY*

NO OTHER SCHOOL  
OR INSTITUTION HAS ITS  
UNIQUE COMBINATION  
OF STRENGTHS.

- A cell-to-society approach focusing on the prenatal stage through adulthood, and from the local community to the global expanse
- A Southern California location at the edge of the Pacific Rim that underscores the school's role as an investigator and proven resource in this social laboratory of immigrant populations and diverse cultures
- A unique focus on research and training that identifies specific challenges derived from chronic diseases, and leads to comprehensive and innovative prevention strategies
- A distinctive transdisciplinary design that—with CGU's eight additional schools and members of The Claremont Colleges as partners—expands an internationally recognized record of successes in implementing disease prevention programs
- Exceptional training programs imbuing students with valuable knowledge from disciplines inside and outside public health, such as public policy, psychology, technology, economics, and management
- Offering the Master of Public Health (MPH) degree, the most widely recognized professional credential for leadership in public health, and a PhD program in prevention science and health promotion designed to train exceptional researchers and scholars in the interdisciplinary field of prevention research
- Expanding its degree offerings with innovative educational programs that combine the best of both the MPH and the strength of CGU's Drucker School MBA

WE HAVE A CLEAR VISION OF WHAT IS NEEDED TO INSURE A HEALTHIER FUTURE FOR COMMUNITIES AT HOME AND AROUND THE WORLD. PROVEN LEADERSHIP AND EXCELLENCE IN RESEARCH AND TEACHING MAKES IT POSSIBLE. COMMITMENTS FROM ENLIGHTENED INVESTORS WILL MAKE IT A REALITY.

# Claremont

## GRADUATE UNIVERSITY

Founded in 1925, Claremont Graduate University is among the top tier of graduate schools in the United States. CGU's nine distinctive schools conduct leading-edge research and award masters and doctoral degrees in and across 22 disciplines. Located in the diverse and global microcosm of Southern California, Claremont Graduate University is devoted entirely to graduate research and study, and boasts a low student-to-faculty ratio. Because the world's problems are not simple nor easily defined, CGU's faculty and students engage the power of transdisciplinary education across the traditional discipline boundaries to create new and practical solutions for the major problems plaguing our world.
