| | M.A., Ph.D. | Blaisdell Programs in World Religions and Cultures Institute for Antiquity and Christianity |
| Applied Women's Studies | | |
| | M.A. | |
| Botany | | |
| | M.S., Ph.D. | Rancho Santa Ana Botanic Garden |

Transdisciplinary Study

Students at CGU are encouraged to pursue personal academic interests and research agendas even when they transcend the traditional boundaries between individual programs.

For instance, at CGU, it is possible for a Ph.D. student in the School of Politics and Economics to select courses offered by the History Department and the Peter F. Drucker/Ito Graduate School of Management. As these fields become integrated into the student's course of study, professors from these programs may become advisors and members of the student's thesis or dissertation advisory committee. More formally structured dual-degree programs allow students to simultaneously earn two degrees: for instance, recent graduates have earned the Master of Business Administration degree and the Ph.D. in psychology.

Academic Organization

Most academic departments at CGU are organized into schools. This organization facilitates coordination of curricular planning among related disciplines and specialties, while protecting the integrity of individual disciplines. In addition, it is meant to enhance the potential for curricular innovation, co-teaching, and creative experimentation by bringing faculty and students in related disciplines into closer and more systematic contact with one another.
