

Does the Career Management Office provide on-campus interviews and information sessions with employers?

The Career Management Office staff works hard to nurture relationships with employers that our students and alumni consider potential employers. When we have a relationship with an employer that desires to conduct interviews on-campus, we will facilitate them. In addition, many employers who arrange on-campus interviews at the various Claremont Colleges via MonsterTrak may make these interviews available to CGU students.

We also provide on-campus information nights with organizations that are interested in building relationships with CGU and hiring its students. Even if on-the-spot interviews for specific jobs may not be available with all these employers, students do have an opportunity to network with key people and contact them about potential job opportunities.
