MANAGED EVALUATION REPORTS AT ASU

[*Note:* One goal of the School of Public Affairs at Arizona State University is to provide community service to government and not-for-profit agencies, particularly in the state of Arizona. I found that the goals of enhancing student learning and of providing community service could both be achieved by having students engage in program evaluation for actual clients. I contacted potential clients and arranged for them to make project presentations to the students; assisted the students in choosing appropriate projects; worked with them in developing client memos of understanding and evaluation designs; assisted them in data analysis; assisted them in producing professional reports; and worked with them on formal oral presentations. Clients consistently stated that the products were very useful, and several students went on to become professional evaluators.]
