Research Grants and Fellowships Received

2018-2019	Principal Investigator, AIDS Healthcare Foundation, “Cognitive Training to Improve HIV Treatment Adherence for YMSM of Color.” Purpose: 1) To develop and evaluate recruitment and retention strategies for use in a cognitive training intervention designed to promote antiretroviral therapy adherence and reduce depressive symptoms among African American and Latino YMSM in the Los Angeles metropolitan area.
2017 – 2018	Principal Investigator, Robert Wood Johnson Foundation, “Treatment Outcome Disparities: Understanding Patient Perceptions of Care.” Purpose: 1) To identify treatment-related perceptions among African Americans patients lost to follow-up for HIV medical care; 2) To explore the extent to which patients perceive specific types of thoughts as either facilitating or serving as barriers to engagement with care and treatment adherence.
2017 – 2018	Principal Investigator, Accelerating Excellence in Translational Science (AXIS) Pilot Project Grant, “Cognitive Training for ART Adherence among African American and Latino YMSM.” Purpose: 1) To develop an individualized, web-based application (app) for delivery of a cognitive training intervention to a target population of African American and Latino YMSM (ages 18-29) with suboptimal adherence and mild to moderately severe depressive symptoms; 2) To refine the app and determine intervention procedures and recruitment strategies through English and Spanish language focus groups with target population members
2017 – 2018	Principal Evaluator, AMAAD Institute, “Resilient Peer Navigation Partnership.” Purpose: 1) To conduct a community needs assessment for adaptation of this SAMHSA-funded project designed to provide trauma-informed substance misuse and HIV prevention navigation services to African American and Latino YMSM in South Los Angeles; 2) To conduct a process and outcome evaluation of the project.

- 2013-2014 Principal Investigator, Educational Research and Initiative Fund, "An Interdisciplinary Approach for Assessing Treatment Motivation among Patients Undergoing Antiretroviral Therapy: Integrating Multidimensional Scaling with Data Provenance Techniques."
Purpose: 1) To develop a novel, web-based application for the assessment of treatment motivation among individual patients living with HIV, and 2) to explore the viability of its use in a clinical setting to promote medication adherence and patient retention.
- 2009-2012 National Institutes of Health Postdoctoral Fellowship in Behavioral Sciences Research in HIV Infection, HIV Center for Clinical and Behavioral Studies Columbia University/New York State Psychiatric Institute
